December 14, 2009

Dear Slip holders:

Your New Dock Committee sincerely appreciates the UHYC membership's support of the new dock project as shown by the overwhelming vote of 100 votes for and 13 against.

The New Dock Committee cannot relax yet! We must award contracts once we get VMRC's approval of the minor changes to the original permit. These changes were necessary to ensure no one would have less clear width in their slips, and that no slip had shallower water. VMRC has indicated that this will be a very simple quick process.

There are some immediate housekeeping matters for your committee at this time. We want to now give all slip owners our best estimate of when their slips need to be vacated. Using the best information at our disposal at this time, we are advising all owners to have their slips vacated by January 31<sup>st</sup>, 2010.

Please complete and return the attached form to us by December 30 so that we can negotiate the best prices for those who want an electrical upgrade from 30 amps to 50 amps, and for those who desire to have the optional added mooring pilings. We suggest you talk to your neighbor to see if you can share this cost.

Some members have indicated their desire to sell their slips, and several renters have expressed their desire to purchase slips. Please indicate your desire to sell, and your committee will try to match up sellers with buyers. We are not interested in your price and terms, we will just provide a list of sellers to the known buyers.

This correspondence will be forward by email to those members who have email and to all others by US mail. We request that those using email print out the form and mail it back to us by US mail, and all others to mail back the original.

Yours sincerely,

Ed Fisher  
Chair – New Dock Committee
